PROFILE

I am a passionate undergraduate BSc (Honours) student in IT at Sri Jayewardenepura University with a strong interest in Software Engineering. I have completed the DiTEC course at ESOFT Metro Campus, enhancing my understanding of software and web development. Additionally, I have also pursued a course in HRM.

MY PROJECTS

Groccery Cart

Effortlessly manage your grocery shopping with our cart system, equipped with CRUD functionality for seamless updates and organization.
MERN | Bootstrap | click

E-Commerce Website

A responsive website with functions including sign-up, login, updating account details, browsing items, managing the shopping cart, viewing order history, accessing order details, and more.
MERN | click

IOT-based Home Security System

Developed an IoT-based home security system prototype featuring real-time monitoring, remote access, light and water motor control, fire detection, security sensors, and gate access with password protection. This system enhances home safety and utility management efficiently.
IoT| Arduino | C++ | click

Japura C2 Leo Club Website - (ongoing)

The project aims to create a dynamic website showcasing a club's details, including information about its projects, board members, and contact details. It will provide an interactive platform for users to explore and engage with the club's activities and members.
HTML | CSS | JavaScript | click

Billing System

A desktop billing system application is created using Python's Tkinter for GUI, alongside Python modules for file handling, random number generation, and email sending.
